About this course

Prerequisites

Successful learners will have prior knowledge and understanding of the following:

- A foundational knowledge of core data concepts and how they're implemented using Azure data services.
- Experience designing and building scalable databases, configuring, monitoring, and optimizing databases to increase business value using Microsoft SQL Server.

Database Administrator Role

- As the Azure database administrator, you implement, configure and manage the operational aspects of cloud-native and hybrid data platform solutions built on SQL Server and Azure SQL services.
- Database administrator use a variety of methods and tools to perform and automate day-to-day operations, including applying knowledge of using Transact-SQL (T-SQL) and other tools for administrative management purposes.

Course schedule

	Day 1	Day 2	Day 3	Day 4
Early morning	<u>Plan and implement data platform resources</u>	<u>Implement a secure environment for a database service</u>	<u>Optimize query performance</u>	<u>Plan and implement a high availability and disaster recovery environment</u>
Break				
Late morning	<u>Plan and implement data platform resources</u>	<u>Implement a secure environment for a database service</u>	<u>Optimize query performance</u>	<u>Plan and implement a high availability and disaster recovery environment</u>
Lunch				
Early afternoon	<u>Plan and implement data platform resources</u>	<u>Monitor and optimize operational resources</u>	<u>Automate database tasks</u>	<u>Plan and implement a high availability and disaster recovery environment</u>
Break				
Late afternoon	<u>Plan and implement data platform resources</u>	<u>Monitor and optimize operational resources</u>	<u>Automate database tasks</u>	<u>Plan and implement a high availability and disaster recovery environment</u>

Get ready for your Microsoft Certification exam

Exam DP-300: Implement scalable database solutions using Azure SQL

Understand the skills measured by the exam

Study area	Percentage
Plan and implement data platform resources	20-25%
Implement a secure environment	15-20%
Monitor, configure, and optimize database resources	20-25%
Configure and manage automation of tasks	15-20%
Plan and configure a high availability and disaster recovery (HA/DR) environment	20-25%

Percentages indicate the relative weight of each area on the exam.
The higher the percentage, the more questions you are likely to see in that area.
